

AI & INTEGRATION CONSULTING · IRONHACK BERLIN

Klar

Clear answers. Real pathways.

An AI-powered Germany readiness diagnostic and application platform
for Latin American students and professionals

THE PROBLEM

Scale is capped by hours, not by demand.

Education consulting for Latin Americans pursuing German pathways is manually intensive. A solo consultant can realistically serve 10–15 clients a month — each needing 3–5 hours of intake, research, and advisory work. Meanwhile, demand is structural and growing.

50%+

Cut to LATAM student

10–15

Clients a solo consultant can
realistically serve per month

No AI-native, Spanish-language advisory service exists for this specific pathway — and there is no way to expand internationally without hiring, which raises fixed costs before revenue justifies it.

THE SOLUTION

AI scores Germany readiness in 3 minutes — a human approves every result.

Conversational diagnostic agent · Claude Sonnet · 6 weighted dimensions · human review gate

Student answers 11 questions

Education, German level,
timeline, finances

AI scores 6 dimensions

Language, education, pathway
fit, timeline, finance, docs

Consultant reviews & approves

Mandatory human checkpoint —
nothing ships unreviewed

Roadmap + matches + documents

Real Ausbildung positions,
bilingual CV & cover letter

Every diagnostic — free or paid — passes through a human consultant before the student ever sees it.

Month 8

Break-even

€39

Self-serve ticket · 15% conversion

Estimates based on actual build cost (€3,700) and live Stripe pricing for the self-serve Germany Application Kit — to be validated during the pilot phase.

Top risks — and how they're managed

20/25

EU AI Act non-compliance

UC-01 is classified High Risk under Annex III

Human review gate satisfies Article 14. Conformity assessment and technical documentation already prepared.

15/25

LLM gives incorrect visa/legal advice

A model error reaching a student unfiltered

Human review is a mandatory architectural component — nothing is delivered without consultant validation.

15/25

GDPR breach via US data transfer

Student data sent to Anthropic's API (US)

Standard Contractual Clauses in place. Anthropic DPA signing tracked as a pre-pilot action item.

These risks are manageable — here's how.

Compliance isn't a checkbox — it's the architecture

EU AI Act

Classification: High Risk — Annex III, Point 3(a)

Reasoning: system profiles students for access to education/training pathways

Obligation met: mandatory human review gate before any result reaches a student (Article 14)

GDPR

Legal basis: Article 6(1)(b) — performance of a contract

DPIA: completed for the highest-risk processing activity (UC-01 scoring)

US transfer: Anthropic API, covered by Standard Contractual Clauses; DPA signing tracked pre-pilot

One architectural decision — mandatory human review — simultaneously satisfies EU AI Act Article 14, GDPR Article 22 (no solely automated decisions), and operational risk mitigation.

Gap identified: Anthropic and LangSmith DPAs are tracked action items to be signed before pilot launch.

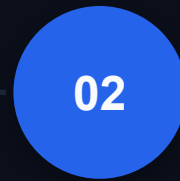

From pilot to scale

MVP

Weeks 1–2 · done

Diagnostic agent, human review, document factory

Pilot

Weeks 3–6

100 diagnostics/mo, sign Anthropic DPA

Scale

Months 2–6

€25K/mo target, UC-02 live, B2B partnerships explored

Go-to-market

LATAM students 22–38 considering Germany — reached via LinkedIn content, WhatsApp student communities, and a DAAD referral partnership.

Pricing model

Self-serve product: free diagnostic + €39 Germany Application Kit. Human review is the trust layer on every result — not a separate billable service.

Greenlight to Phase 3

100 diagnostics/month sustained at 15%+ conversion, with consultant review time under 2 minutes per diagnostic.

CONCLUSION

**From confusion to a concrete plan —
in three minutes, with a human checkpoint on every result.**

High-risk classified. Article 14 compliant by design. DPIA complete.
Production-ready governance, not an afterthought.

Next step: a 60-day pilot — 100 diagnostics, validated conversion, signed DPAs.
